

## GRAVERMACH AT

GRS #

004-965

IKOHE #

32-1157

**Package Includes :** U.S. style IEC electrical cord plus Schuko adapter, foot control and multi-mount air filter. 110-240Volt, 50-60HZ. Handpieces sold separately,.

**Shipping Weight:**  
Approx. 22.700lbs (10.30kg)

### Specifications:

Length: 13" (330.2mm)

Width: 6" (152.4mm)

Height: 8.25" (209.55mm)

### Product Description:

Never before has a pneumatic handpiece system given the user so much versatility and control. A remarkable technical breakthrough is the seamless combination of hand and foot control. Using one simple knob, the user can choose between hand or foot control whenever they desire. This allows optimal working comfort and precision in a wider range of creative jobs than ever.

The new GraverMach AT is wonderfully familiar to anyone who uses its predecessors including the GraverMax, GraverMax SC or the original GraverMach. But the expanded capability of precise, selectable hand control puts this new power tool in a class by itself. The hand control technology is based on the GRS Airtact. This advanced (patent pending) air logic system provides hand power control without adding moving parts to the handpiece itself. The result is a rugged and intuitive way to control handpiece power by hand. But remember, when foot control is preferred, it's only 2 seconds away. It's one simple selector knob, but it instantly gives you greater control, choice and refinement in your work. The ability to instantly change from hand to foot control whenever you want means new creative freedom and reduced stress.

## GRAVERMAX G8

GRS #

004-995

IKOHE #

32-1158

**Package Includes :** U.S. style IEC electrical cord plus Schuko adapter, foot control and multi-mount air filter. 110-240Volt, 50-60HZ. Handpieces sold separately,.

**Shipping Weight:**  
Approx. 20.800lbs (9.43kg)

### Specifications:

Length:	12" (304.8mm)
Width:	5.25" (133.35mm)
Height:	8.25" (209.55mm)

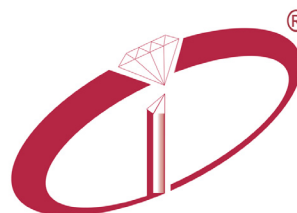

### Product Description:

The new GraverMax G8 is an upgraded model of the previous GraverMax (#004-980). This model is based on the original GraverMach (#004-960).

This engraving system gives each handpiece excellent range of power with perfect control throughout an expanded range of impact speeds. The GraverMax G8 features 400 to 8000 strokes per minute, a throttle bias adjustment valve for tailoring throttle response to your work and a dual-stage precision air regulator.

Advanced ergonomics include front air pressure adjustment, Quick Change air couplings, rear mount throttle connection, and an advanced valve pulse unit that operates with virtually no noise or vibration. The GraverMax G8 has connections for two impact handpieces plus an auxiliary air connection for other air tools, including the GRS Ultra 850 rotary handpiece. Handpieces sold separately. All GraverMax and GraverMate handpieces can be used with this machine.

## GRAVERSMITH

GRS # 004-895  
 IKOHE # 32-1159

**Package Includes :** • Heavy-duty foot control • Built-in air regulator with integral pressure gauge  
 • One (1) Handpiece outlet • Remote air filter • Built-in carry handle • Built-in tool storage

**Shipping Weight:**  
 Approx. 16.400lbs (7.44kg)

### Specifications:

Length:	10" (254mm)
Width:	5.75" (146.05mm)
Height:	9" (228.6mm)

### Product Description:

This new power tool offers basic work capability and pneumatic impact power for stone setting and engraving. It's ideal for production stone setters, multiple factory installations, and individual craftsmen on a budget.

Like all GRS power tools, it reduces worker fatigue, increases production, and improves quality. A choice of handpieces allows the GraverSmith to fit a wide range of applications and user preferences.

## METAL FORMER

Bends Perfect "C" Bracelets Everytime

**GRS #** 004-725  
**IKOHE #** 29-1101

**Package Includes :** Former body, two dies, one die cup, and wrench.

Bracelet / bracelet materials not included.

**Shipping Weight:**  
**Approx. 7.00lbs (3.5kg)**

### Specifications:

Length: 14"

Width: 5"

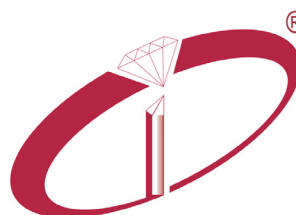

Height: 5"

### Product Description:

Easily shape "C" style bracelets with the GRS Bracelet Former. Form flat strips of metal to a perfect "C" shape after you have engraved your design. The die cup contains a soft alloy material that supports pressure from the die, but does not distort your engraving work. The die cup material can be reformed by heating when necessary.

The GRS Metal Former unit comes with two different fixed die sizes and one adjustable die cup. Metal strips that are 0.25" (6.35mm) up to 1.25" (31.75mm) wide can be formed. Recommended for soft metals such as copper, silver, and gold alloys at a thickness of 0.030" to 0.080" (0.76mm to 2.03mm). An optional accessory for the GRS Metal Former is the Urethane Die Cup & Flat Die. It includes a conformable urethane die cup and a flat forming die for low dome and other bracelets with flat inside surfaces. It also can be used for non-traditional jewelry metals including some stainless steels up to 0.080" (2mm) thick..
